

HOW TO CONNECT A CUSTOM NEON SIGN

SAFETY INSTRUCTIONS

Please carefully study the instruction manual and information below before installing or using this product. Please keep this user manual for further reference.

1. This LED neon sign is intended for indoor application only. Do not use in damp or wet locations. Do not install it in an area that will exceed 120°F (49°C).
2. This LED neon sign works only with low voltage 12V DC. Please always use the attached power adapter to power up the sign. Do not connect the sign directly to the line voltage. If in any doubt, please consult a local electrician.
3. Disconnect power before handling or cleaning. Maintenance of the luminaires is limited to their surfaces. During maintenance, no moisture can come into contact with any areas of the terminal connections or voltage control parts.
4. Clean with a soft, dry cloth. Do not use solvents or chemicals. Avoid dampness on all electrical components.

For indoor use only. Avoid direct contact with water.

The light is designed to work only with the indicated voltage. Different items require different working voltages.

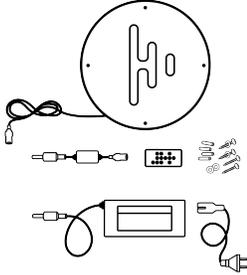

This electric sign is built in compliance with UL requirements and standards.

This luminaire cannot be disposed of with regular domestic waste in a standard rubbish can. You have to bring it to a staging area for electrical waste.

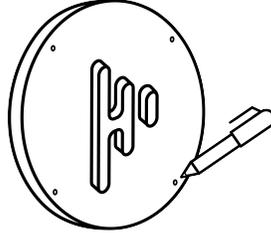

INSTALLATION

1

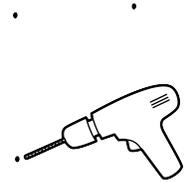

Prepare your Custom Neon Set (Custom Neon, RF Remote Receiver, 12V Power Adaptor, Ceiling Mounted Wire Installation Accessories: Screws, Washers, and Drywall Anchors)

2

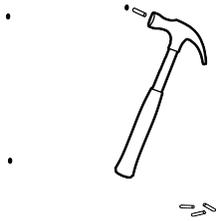

Find an area to put your sign, mark each holes with a pencil.

3

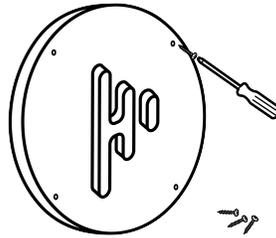

Make a hole on each mark using a drill with a 1/8" (6mm) drill bit.

4

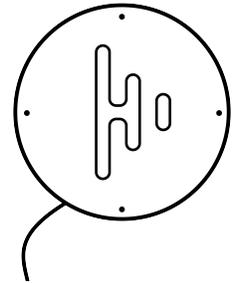

Tap the drywall anchor in the hole with a hammer.

5

Align the holes then screw the nails into the drywall anchors using a screwdriver.

6

Finally, fix the wiring based on our guide, plug in the power adapter, and light it up
